I'm sorry,

Dave.

I'm afraid I

can't do that.

We no longer say 'yes';
Instead, we say «affirmative»

[Jemaine]

Affirmative. That's true

[Bret]

Yeah

A robot is a machine—especially one programmable by a computer—capable of carrying out a complex series of actions automatically. A robot can be guided by an external control device, or the control may be embedded within. Robots may be constructed To Learn Nearly human Kind manners, but most Z300's are task-performing machines, designed with an focus on Just functionality, rather than Visualized expressions. Your definition is about mechanical robots. For software agents, see Bot. For 0-4 other uses of the term, see Robot (@disambiguation).
